

Working group 4

Minutes of the Leader: Fabio Migliacci

The web site (www.cost-action-fp0905.eu.) is active from..... The structure and the activity of the Action are uploaded.

In particular, the procedure to be followed for STSM application is available.

A facebook site to increase traffic to the Action's website has been opened as requested at the 1st MC, and is connected to the forum of the Action. In relation to this, the MC is invited to nominate as soon as possible some moderators so that the discussion in the forum and in facebook can start.

The surveys one concerning field trials and the other one on greenhouse experiments prepared within WG1 will be put in the web site to facilitate the collection of the information from any part of the world. To fill the survey, it will be asked obligatory to make a registration in the web site to avoid as much as possible that "false information" are uploaded. Automatically, the information inserted in the surveys will arrive to the Leader and Vice Leader of WG1 for a revision. The information deriving from the survey will permit to start the preparation of the GMP database in the web site.

The WG Leaders and all the MC have been invited to cooperate as closely as possible to update the web site with the ongoing of the activity of the Action and to give any suggestion to improve the flow of the information through the web site.

Fabio Migliacci, Leader of WG 4
